

Oakridge Resort WANAKA

A stunning and iconic venue in Wanaka. This construction project was a real test as it had scale, tight time frames and details within details to be managed.

This build required every ounce of experience which had been gained through projects such as the Millennium Hotel, Heritage Hotel, Copthorne Hotel and more, to be drawn upon when tackling this 29 unit development, as this build had to happen all at once.

The integration of various materials and blending of construction methods giving subtle contrasts, gave the build a chance to blend into the Cardrona and for other trades to have a scope to give their ideas, expertise and ultimately their very best.

The interiors were solid, square, plumb and sound, providing a good choice in fit-out which, in the end, gave the owners a finish to be proud of.

Stunning, solid and a one-off! Quite simply, one the builds we are most proud of.
